

STABLYX[®]

cmc arthroplasty system
by skeletal dynamics

Restore Function While Preserving the Trapezium

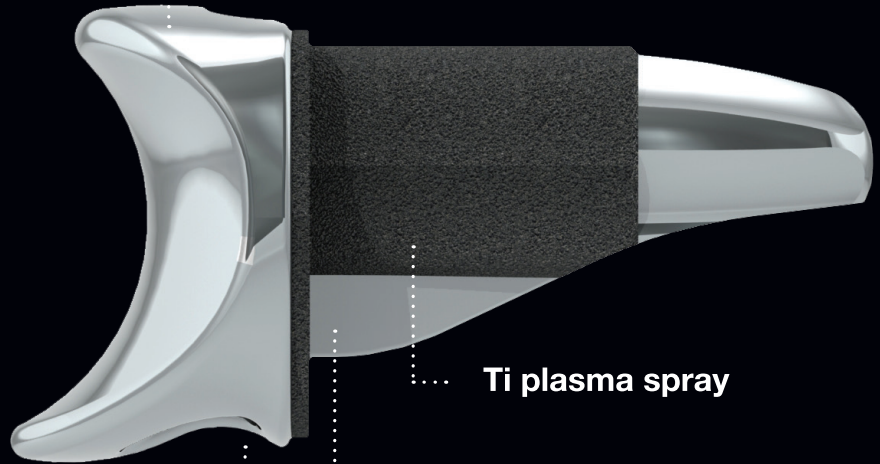

-
- + Restore CMC Kinematics
 - + Designed to Prevent Dorsal Subluxation
 - + Dedicated Instrumentation to Facilitate Trapezioplasty
-

STABLYX[®]

cmc arthroplasty system
by skeletal dynamics

Optimized articular geometry to restore the natural kinematics

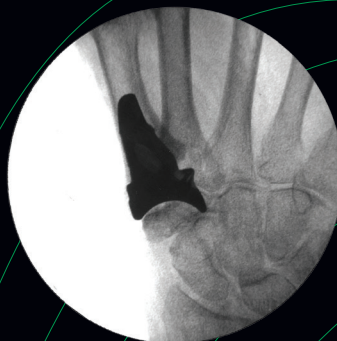

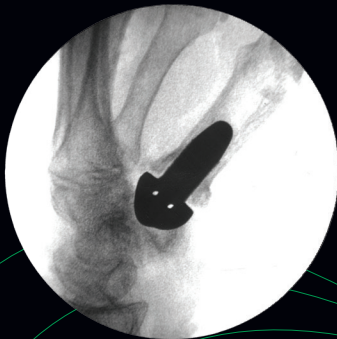

Ti plasma spray

Keel provides rotational stability

Suture holes for added stability in cases of severe laxity

Redirected articular surface prevents dorsal subluxation
